"Financing Premium" means that the premium cost to acquire or enter into the derivative is paid at the end of the derivative contract or throughout the derivative contract.

"Swaption" means an agreement granting the owner the right, but not the obligation, to enter into an underlying wap

"Margin Deposit" means a deposit that a reporting entity is required to maintain with a broker with a spect to the Futures Contracts purchased or sold.

DEFINITION OF NOTIONAL AMOUNT

The definition below is intended to be a principle for determining notions. It rall a rivative instruments. To the extent a derivative type is not explicitly addressed in a through c, notional should be reported in a manner consistent with this principle.

"Notional amount" is defined as the face value of a financia. "strue ant in a derivatives transaction as of a reporting date, which is used to calculate future payments in the reporting arrency. Notional amount may also be referred to as notional value or notional principal amount. The notional amount reported should remain static over the life of a trade unless the instrument is partially unwound or has a contract unity a nortizing notional. The notional amount shall apply to derivative transactions as follows:

- a. For derivative instruments other than fur ies contral s (e.g., options, swaps, forwards), the notional amount is either the amount to which interest rates are applied in order to calculate periodic payment obligations or the amount of the contract value used to determine the cash observations. Non-U.S. dollar contracts must be multiplied or divided by the appropriate inception foreign currency rate.
- b. For futures contracts, with a U.S. allar-denominated contract size (e.g., Treasury note and bond contracts, Eurodollar futures) or underlying, to not onal amount is the number of contracts at the reporting date multiplied by the contract size (value one point militiplied by par value).
- c. For equity index and similar stures, the number of contracts at the reporting date is multiplied by the value of one point multiplied by the transaction price. Non-U.S. dollar contract prices must be multiplied or divided by the appropriate inception foreign currency rate.

GENERAL INSTRUCTIONS FOR SCHEDULE DB

Each derivative instrument should be reported in Parts A, B or C according to the nature of the instrument, as follows:

Part A: Positions in Options,* Caps, Floors, Collars, Swaps, and Forwards**

Part B: Positions in Futures Contracts

Part C: Positions in Replication (Synthetic Asset) Transaction

- * Warrants acquired in conjunction with public or private debt or equity that are more appropriately reported in other schedules do not have to be reported in Schedule DB.
- ** Forward commitments that are not derivative instruments (for example, the commitment a purchase a GNMA security two months after the commitment date or a private placement six months rice. be a unitment date) should be disclosed in the Notes to Financial Statements, rather than on Schedule DI.

All derivatives, regardless of maturity date, are to be reported on Schedule DB. Forwar, format where the reporting entity cannot determine at the inception of the contract, with certainty, if delivery will be in... at the earliest opportunity are essentially forward contracts and should be reported on Schedule DB.

The reporting entity may be required to demonstrate the intended hedging characterists, under state statute in order to report in this derivative "Hedge Other" category.

The fair value is the value at which the instrument(s) could be exc. nge. in a current transaction. Amortized or book/adjusted carrying values should not be substituted for fair value, table parket quotes are the best indication of fair value. The reporting entity should document the determination of this value.

Part D should be used to report the counterparty exposure (i.e., the exposure to credit risk on derivative instruments) to each counterparty (or guarantor, as appropriate).

Derivatives shall be shown gross when reported in the Cabeu. Do. If these transactions are permitted to be reported net in accordance with SSAP No. 64—Offsetting and No. ing of a sets and Liabilities, the investment schedule shall continue to provide detail of all transactions (gross), with the net amount from the valid right to offset reflected in the financial statements (pages 2 & 3 of the statutory financial statements). Disclosures for items reported net when a valid right to offset exists, including the gross amount, the amount offset, and the net amount reported in the financial statements are required per SSAP No. 64—Offsetting and Netting of Asset and Liabilities.

Definitions:

Hedging Effective:

A derivative transaction that is used in hedging transactors at the criteria of a highly effective hedge as described in SSAP No. 86—Derivatives, which are valued and reported in a manner that is consistent with the hedged asset or liability. The sectral sections have been voluntarily designated and are effective as of the reporting date.

Hedging Other:

A derivative transaction that is used in a facility disaction where the intent is for an economic reduction of one or more risk factors. The transaction is not part of an effectively designated relationship as described under SSAP No. 86— erivatives

Replication:

A derivative transaction of ered into in conjunction with other investments in order to reproduce the investment characteristics. If otherwise permissible investments as described under SSAP No. 86—Derivatives. A derivation on tion entered into by a reporting entity as a hedging or income generation transaction shall not be considered a replication (synthetic asset) transaction. These transactions are considered to be split tions as of the reporting date.

Income Generation:

A derivative transaction written or sold to generate additional income or return to the reporting entity as described index CAP No. 86—Derivatives.

Other:

A de vative transaction written or sold by the reporting entity used for means other than (1) Hedging Effective; (2) Hedging Other; (3) Replication; or (4) Income Generation (definitions listed above or referenced in SSAP No. 86—Derivatives). When this subcategory is utilized, a description of the use should be included in the footnotes to the financial statements.

Value of One (1) Point:

The monetary value of a one (1) point move in a futures position published by the exchange. May also be referred to as "Lot Size," "Lots" or "Points" by the exchange.

Interest rate and currency swaps (where receive/(pay) notional amounts are denominated in different currencies), are filed under the "Foreign Exchange" swap subcategory.

SCHEDULE DB - PART A - SECTION 1

OPTIONS, CAPS, FLOORS, COLLARS, SWAPS AND FORWARDS OPEN DECEMBER 31 OF CURRENT YEAR

Include all options, caps, floors, collars, swaps and forwards owned on December 31 of the current year, including those owned on December 31 of the previous year, and those acquired during the current year.

Column 1 — Description

Give a complete and accurate description of the derivative instrument including a description of the underlying securities, currencies, rates, indices, commodities, derivative instruments, on other financial market instruments.

Include details such as:

- For options, the basis. For example, caps should include the parlying interest rate (e.g., CMS 5 year) and frequency of the reset (typically three money);
- For credit default swaps, the name of the reference entity v sing assuer or an index) and the
 equity ticker symbol, if available;
- For currency derivatives, report the currency and prib. 12 pay/receive (or buy/sell) legs of the transaction; and
- For baskets, note that it is a basket and inclus the nive equity tickers, if applicable.
- For derivatives with financing premium, include information on the terms of the financing premium, including whether it is due eriod. ally or at maturity, and the next payment date.

Where leveraging is a feature of the payment terms, the multiplier effect will be clearly presented in the description.

For swaptions, include the height 2 number, the tenor of the option (i.e., time from effective date to maturity date of the option a spect), and the start and end dates of the underlying swap.

If traded on an exchange, do lose the ticker symbol. Indicate the maturity of the underlying, as appropriate.

Do not use internal descriptions or identifiers unless provided as supplemental information.

Column 2 — Description of Its n(s) a dged, Used for Income Generation or Replicated

Describe the "sea, or "abilities hedged, including CUSIP(s) when appropriate. For example, "Bond Portfolio Hedge," "VAGLB Hedge," "Fixed Annuity Hedge," "Investment in Foreign Operations," etc.

If hereing a specific bond, report the CUSIP and a complete and accurate description of the bond; if multiple USIPs, note that there are multiple CUSIPs and report the equity ticker or name of the unman parent, as applicable.

If pdg Ig a guaranteed investment contract or funding agreement, report as "GIC Hedge" or "FA 'edge."

For a foreign operations hedge, report as "Net Investment in Foreign Operations."

For annuity hedging, describe whether hedging fixed or variable annuities.

If hedging a specific mortgage loan asset, report as "Mortgage Loan" and provide the corresponding loan number reported on Schedule B, Part 1, Column 1.

Describe the assets against which derivatives are written in income-generation transactions.

If a replication, report the RSAT Number and Description of the RSAT (Columns 1 and 2 from Schedule DB, Part C, Section 1).

Column 3 - Schedule/Exhibit Identifier

Identify the Schedule or Exhibit of the hedged item(s), such as Schedule A, B, BA, D Part 1, D Part 2, Section 1; or D, Part 2, Section 2, if appropriate. Otherwise "N/A."

Use clear abbreviations for schedules, such as D 1 (Schedule D, Part 1) D 2-1 (Schedule D, Part 2, Section 1), D 2-2 (Schedule D, Part 2, Section 2), etc.

Column 4 - Type(s) of Risk(s)

Identify the type(s) of risk(s) being hedged: "Interest Rate," "Credit," "Durane" "Currency," "Equity/Index," "Commodity" or, if reporting other risks, provide a description of the root within the field or in the footnote listed at the end of this section.

If footnoted, please enter a reference code in this column (e.g., a, b, c, etc.) then disclose the description of the risk in Schedule DB footnotes for each reference code year. The schedule.

In the event there is more than one type of risk, use the most relevant risk

Column 5 - Exchange, Counterparty or Central Clearinghouse

Show the name, followed by the Commodity Future 5 rading Commission's Legal Entity Identifier (LEI), if an LEI number has been assigned, of the exchanges constructed the transfer of the exchanges constructed the control of the exchanges constructed the control of the exchanges constructed the control of the exchanges constructed the exchanges constructed

If exchange-traded, show the name and the LEI of the exchange, Board of Trade or contract market.

If OTC traded, show the name and the LEI of punterparty and the guarantor upon whose credit the reporting entity relies.

Column 6 - Trade Date

Show the trade date of the enginal transaction.

The reporting entity may sum, vize on one line all identical derivative instruments with the same exchange or counterparty showing me last trade date, but only if the instruments are identical in their terms; e.g., type, mature y, expiration or settlement, and strike price, rate or index.

Column 7 - Date of Maturity a Ex, rate of

Show the date of in turbly or expiration of the derivative, as appropriate.

Column 8 - Nunther of Contracts

Show the water of contracts, as applicable (e.g., for exchange-traded derivatives) as an absolute (on-ne ative) value.

Column 9 - Nocuma Amount

Show the notional amount. Notional amounts are to be reported as an absolute (non-negative) value. Guidance for determining notional is included in the Schedule DB General Instructions and SSAP No. 86—Derivatives.

If the replication (synthetic asset) transactions are not denominated in U.S. dollar, convert it into U.S. dollar equivalent in accordance with SSAP No. 23—Foreign Currency Transactions and Translations.

Column 10 - Strike Price, Rate or Index Received (Paid)

Show the strike price, rate or index for which payments are received (paid), or an option could be exercised or which would trigger a cash payment to (by) the reporting entity on a derivative.

Forward exchange rate must be stated as: Fx Currency per USS (Fx/US\$).

For credit derivatives, state "credit event" when the payment is triggered by a standard International Swaps and Derivatives Association (ISDA) defined credit event.

Describe non-standard credit event in footnotes to the annual statement.

For example, for a credit default swap sold at 0.50% per annum, show "0.50 / (cred. event)," or for an interest swap with 4.5% received, LIBOR ± 0.50% paid, show "4.50 / (L±0.00)."

Column 11 — Cumulative Prior Year(s) Initial Cost of Undiscounted Premium (Received)

For derivatives opened in prior reporting years, show the or mula ver undiscounted, remaining premium or other payment (received) paid since the derivative contract was entered into.

If a derivative has been partially terminated, the terminated positive of the premium is reported in Schedule DB, Part A, Section 2.

Column 12 - Current Year Initial Cost of Undiscounted Premium (Receive) Paid

For derivatives opened in the current report of yet, or for derivatives in which premiums are paid throughout the derivative contract, show the und seconded premium or other payment (received) paid in the current year.

Column 13 - Current Year Income

Show the amount of income received, paid), on accrual basis, during the year (excluding the amount entered in Column 11).

If such payments are both receive, and paid (e.g., interest swaps), show the net amount (excluding taxes).

Column 14 - Book/Adjusted Caryn, Vanae

Represents star por value with any nonadmitted assets added back.

Refer to SSAP No. 66—Derivatives for further discussion.

Column 15 - Code

I sert * in this column if the book/adjusted carrying value is combined with the book/adjusted carrying value of assets or liabilities hedged; the book/adjusted carrying value is combined with the k/adjusted carrying value of underlying/covering assets; or if the amount is combined with consideration paid on underlying/covering assets.

Insert # in this column if the book/adjusted carrying value was combined in prior years with the book/adjusted carrying value of assets or liabilities hedged.

Insert @ in this column if the income/expenses is combined with income/expenses on assets or liabilities hedged.

Insert ^ in this column if the derivative has unpaid financing premiums.

Column 16 - Fair Value

See the Glossary of the NAIC Accounting Practices and Procedures Manual for a definition of fair value. For purposes of this column, fair value can be obtained from any one of these sources:

- A pricing service.
- b. An exchange.
- Broker or custodian quote.
- Determined by the reporting entity.

Column 17 - Unrealized Valuation Increase/(Decrease)

For purposes of this schedule, **increases** should be reported when the change results in an increase to the asset or a decrease to the liability. A **decrease** should be reported who, the change results in a decrease to the asset or an increase to the liability.

The total unrealized valuation increase/(decrease) for a specific derivative will be the change in Book/Adjusted Carrying Value that is due to carrying a seried (in the previous year) the derivative at Fair Value.

These amounts are to be reported as unrealize capital gains/(losses) in the Exhibit of Capital Gains/(Losses) and in the Capital and Surplus Account.

Column 18 — Total Foreign Exchange Change in Book/Adjuste Carrying Value

This is a positive or negative amount that it defined as the portion of the total change in Book/Adjusted Carrying Value for the year that is "trib" tole to foreign exchange differences for a particular derivative.

The amounts reported in this column, hould be included as net unrealized foreign exchange capital gain/(loss) in the Capital and Su., 'us Account.

For purposes of this a pedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a deer, so to the asset or an increase to the liability.

Column 19 - Current Yes (Am. vation)/Accretion

For process of this schedule, **positive amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change result in a decrease to the asset or an increase to the liability.

Column 20 - A 'sustry int to the Carrying Value of Hedged Item

represents the amortized book/adjusted carrying value used to adjust the basis of the hedged item(s) during the current year.

Column 21 - Potential Exposure

Potential Exposure is a statistically derived measure of the potential increase in derivative instrument risk exposure, for derivative instruments that generally do not have an initial cost paid or consideration received, resulting from future fluctuations in the underlying interests upon which derivative instruments are based.

For collars, swaps other than credit default swaps and forwards, the Potential Exposure = 0.5% x "Notional Amount" x Square Root of (Remaining Years to Maturity).

For credit default swaps, enter the larger of notional amount or maximum potential payment.

For purchased credit default swaps bought for protection, the amount reported will be zero.

If the maximum potential exposure cannot be determined, enter alro and explain in the Notes to Financial Statement.

Disclose in the footnotes to the annual statement any assets, held other collateral or by third parties that the reporting entity can obtain and liquidate to recover all or a partion of the amounts paid under the derivative.

Column 22 - Credit Quality of Reference Entity

Only applies to credit default swaps (for other derivatives, leave blank)

Disclose:

- NAIC designation of the reference entity; or, if not available, then
- NAIC designation equivales of the reference entity, if it is CRP rated; or, if not available, then
- The reporting entity own credit assessment translated into an NAIC designation
 equivalent ith a "*" to indicate that the designation is based on the reporting entity's
 own internal columniary of the reference entity's creditworthiness.

For first loss type of bar let credit default swaps, use the lowest designation in the basket.

For other types of tasks, or other structures, determine a designation that fairly represents the likelihood of creat loss.

Column 23 - Hedge Effects mess as inception and at Year-end

For it, ge transactions show as a percentage expressed as (XX / YY), where "XX" shows the hedge effective as percentage at inception and "YY" shows the hedge effectiveness percentage on Dicentury. In of the current year.

Fe example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on Pecember 31 of the current year is reported as "100 / 95."

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number used in the schedule.

A reference code number may be used multiple times in this column to indicate the same explanation.

For example: 0001 Reduces bond portfolio duration by .2 years.

a) Fair Value Hedges:

How much of the change in value of the hedged item(s) was hedged by the change in value of the derivative, both:

- At the inception of the derivative transaction.
- On December 31st end of the current year.

b) Cash Flow Hedges:

How much of the change in eash flows or present value of eash flows of the hedged item(s) was hedged by the change in eash flows or present value of eash flows of the decreative, both:

- · At the inception of the derivative transaction, and
- At the end of the current year.

** Columns 24 through 31 will be electronic only. **

Column 24 - Fair Value Hierarchy Level and Method Used to Obtain Fan Jue code

Whenever possible, fair value should represent the arroun. In mey the reporting entity would receive (pay) in order to close the derivative position at the man, of price. Fair value should only be determined analytically when the market price-based value can not be obtained.

The following is a listing of valid fair value level, digators to show the fair value hierarchy level.

```
"1" for Level 1
```

"2" for Level 2

"3" for Level 3

The following is a listing of the valid method indicators for derivatives to show the method used by the reporting entity to detail nine the Fair Value.

"a" For derivatives, there the fair value is determined by a pricing service.

"b" For a riva. ... where the fair value is determined by a stock exchange.

- "For derivatives where the fair value is determined by a broker or the reporting entity's ustodian. To use this method 1) the broker must be approved by the reporting entity as a declative counterparty; and 2) the reporting entity shall obtain and retain the pricing policy of he broker or custodian that provided the quotations.
- or For derivatives where the fair value is determined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

Enter a combination of hierarchy and method indicator. The fair value hierarchy level indicator would be listed first and the method used to determine fair value indicator would be listed next. For example, use "Ib" to report Level 1 for the fair value hierarchy level and stock exchange for the method used to determine fair value.

Column 25 - Source Used to Obtain Fair Value

For Method Code "a," identify the specific pricing service used.

For Method Code "b," identify the specific stock exchange used.

The listing of most stock exchange codes can be found in the Investment Schedules General Instructions or the following Web site:

www.fixprotocol.org/specifications/exchanges.shtml

For Method Code "c," identify the specific broker or custodian used.

For Method Code "d," leave blank.

Column 26 - Method of Clearing (C or U)

Indicate whether derivative transaction is cleared through a central clear, whouse with a "C" or not cleared through a centralized clearinghouse with a "U."

Column 27 - Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEP) for any punceiparty as assigned by a designated Local Operating Unit. If no LEI number has been assign. It leave blank.

Columns 28 through 31 are for derivatives with financing premise s

Column 28 — Total Undiscounted Premium Cost

Report the total, undiscounted (contractual) of acquire/enter into the derivative.

Column 29 – Unpaid Undiscounted Premium Cost

Report the undiscounted (contractual) ost to acquire/enter into the derivative unpaid by the reporting entity.

Column 30 - Fair Value of Derivative Excluding Impact of Financing Premiums

Reflect the fair value of the derivative adjusted to exclude the impact of discounted future settled premiums. For example, if the fair value of the derivative reported in column 16 has been reduced due to expected each outflow's representing the reporting entity's future payment of financing premiums, the consider on the fair value of the derivative captured in this column.

(At act disition, a derivative may be reported with a net zero fair value in column 16 as the value of the derivative and the net present value of future financing premiums owed from the acquisition of the derivative may offset. The fair value reported in column 30 shall reflect the fair value of the derivative ithout in offset for the future financing premiums.)

Column 31 _ _ Incarrzed Valuation Increase/Decrease, Excluding Impact of Financing Premiums

Reflect the unrealized gain or unrealized loss reported for the derivative adjusted to exclude the impact from discounted future settled premiums. For example, if the valuation increase/valuation decrease reported in column 17 includes "losses" to recognize the net present value of the financing cost owed by the reporting entity, those "losses" shall be removed from the unrealized valuation increase/decrease reflected in this column.

SCHEDULE DB - PART A - SECTION 2

OPTIONS, CAPS, FLOORS, COLLARS, SWAPS AND FORWARDS TERMINATED DURING CURRENT YEAR

Include all options, caps, floors, collars, swaps and forwards which were terminated during the current reporting year, both those that were owned on December 31 of the previous reporting year, and those acquired and terminated during the current year.

Column 1 — Description

Give a complete and accurate description of the derivative instrument including a description of the underlying securities, currencies, rates, indices, commodities, derivative instruments, or other financial market instruments.

Include details such as:

- For options, the basis. For example, caps should inc. de the underlying interest rate (e.g. CMS 5 year) and frequency of the reset (typically three in aths);
- For credit default swaps, the name of the reference entity (a negle issuer or an index) and the
 equity ticker symbol, if available;
- For currency derivatives, report the currency of describe the pay/receive (or buy/sell) legs of the transaction; and
- For baskets, note that it is a basket and include a stop five equity tickers, if applicable.
- For derivatives with financing prenous half bude information on the terms of the financing premium, including whether it is due periodically or at maturity, and the next payment date.

Where leveraging is a feature of the payment to ms, the multiplier effect will be clearly presented in the description.

If traded on an exchange asclose e tieker symbol. Indicate the maturity of the underlying, as appropriate.

Do not use internal descriptions of centifiers unless provided as supplemental information.

Column 2 — Description of Item(s) edged, Used for Income Generation, or Replicated

Describe the assess of abindies hedged, including CUSIP(s) when appropriate. For example, "Bond Portfolio I doe, "VAG B Hedge," "Fixed Annuity Hedge," "Investment in Foreign Operations," etc.

If hedging a sp. ific bond, report the CUSIP and a complete and accurate description of the bond; if multiple CUSIPs, note that there are multiple CUSIPs and report the equity ticker or name of the ultimate parent, as applicable.

I medging a guaranteed investment contract or funding agreement, report as "GIC Hedge" or "FA I redge."

ar a foreign operations hedge, report as "Net Investment in Foreign Operations."

For annuity hedging, describe whether hedging fixed or variable annuities.

If hedging a specific mortgage loan asset, report as "Mortgage Loan" and provide the corresponding loan number reported on Schedule B, Part 1, Column 1.

Describe the assets against which derivatives are written in income-generation transactions.

If a replication, report the RSAT Number and Description of the RSAT (Columns 1 and 2 from Schedule DB, Part C, Section 1).

Column 3 - Schedule/Exhibit Identifier

Identify the Schedule or Exhibit of the hedged item(s), such as Schedule A; B; BA; D, Part 1; D, Part 2, Section 1; or D, Part 2, Section 2, if appropriate. Otherwise "N/A."

Use clear abbreviations for schedules, such as D 1 (Schedule D, Part 1) D 2-1 (Schedule D, Part 2, Section 1), D 2-2 (Schedule D, Part 2, Section 2), etc.

Column 4 - Type(s) of Risk(s)

Identify the type(s) of risk(s) being hedged: 'Interest Rate," "Credit," "Durane," "Currency," "Equity/Index," "Commodity" or, if reporting other risks, provide a description of the rolls within the field or in the footnote at the end of this section.

If footnoted, please enter a reference code in this column (e.g., a, b, c, etc.) then disclose the description of the risk in Schedule DB footnotes for each reference code, year, the schedule.

In the event there is more than one type of risk, use the most relevant risk

Column 5 — Exchange, Counterparty or Central Clearinghouse

Show the name, followed by the Commodity Future and rading Commission's Legal Entity Identifier (LEI), if an LEI number has been assigned, for the exchange, constraints or central clearinghouse.

If exchange-traded, show the name and the LEI of the exchange, Board of Trade or contract market.

If OTC traded, show the name and the LEI of the counterparty and the guaranter upon whose credit the reporting entity relies.

Column 6 - Trade Date

Show the trade date of the enginal transaction.

The reporting entity may sum, vize on one line all identical derivative instruments with the same exchange or counterparty showing the date of last trade date, but only if the instruments are identical in their terms (e.g., type, a sturity, expiration or settlement, and strike price, rate or index).

Column 7 - Date of Maturity , Ex, rat. n

Show the da of naturally or expiration of the derivative, as appropriate.

Column 8 - Termination Date

Show the "to on which the contract/agreement was terminated. Reporting entities may summarize on a le line all identical instruments with the same exchange or counterparty, using the latest termination ate, by only if the instruments are identical in their terms (e.g., type, maturity, expiration or settrement, and strike price, rate or index).

Column 9 Indicate Exercise, Expiration, Maturity or Sale

Indicate the cause of termination.

Column 10 - Number of Contracts

Show the number of contracts, as applicable (e.g., for exchange-traded derivatives), as an absolute (non-negative) value.

Column 11 - Notional Amount

Show the notional amount. Notional amounts are to be reported as an absolute (non-negative) value. Guidance for determining notional is included in the Schedule DB General Instructions and SSAP No. 86—Derivatives.

If the replication (synthetic asset) transaction is not denominated in U.S. dollar convertit into U.S. dollar equivalent in accordance with SSAP No. 23—Foreign Currency Transactions and Translations.

Column 12 - Strike Price, Rate or Index Received (Paid)

Show the strike price, rate or index for which payments are received (pa. 1), or an option could be exercised, which would trigger a cash payment to (by) the reporting entry on a derivative.

Forward exchange rate must be stated as: Fx Currency per US. Fx/US >>.

Column 13 - Cumulative Prior Year(s) Initial Cost of Undiscounted Sermium. Received) Paid

For derivatives opened in prior reporting years so we as cumulative, undiscounted, remaining premium or other payment (received) paid since to derivative contract was entered into.

Column 14 - Current Year Initial Cost or Undiscounted Prenn, m (Received) Paid

For derivatives opened in the current reporting year, show the undiscounted premium or other payment (received) paid when the derivative contract processes entered into.

Column 15 - Consideration Received (Pr a) on Ten ination

Show the amount of consideration regulated (paid).

Column 16 - Current Year Income 4

Show the amount of in time received (paid) accrued for the current year.

Column 17 - Book/Adjus Ca. vin Value

Represents the statement value with any nonadmitted assets added back.

Refer to S. 44 No. 86—Derivatives for further discussion.

Column 18 - Code

Insert * in this column if the book/adjusted carrying value is combined with the book/adjusted carrying value of assets or liabilities hedged; if the book/adjusted carrying value is combined with the book/adjusted carrying value of underlying/covering assets; or if the amount is combined with consideration paid on underlying/covering assets.

Insert # in this column if the book/adjusted carrying value was combined in prior years with the book/adjusted carrying value of assets or liabilities hedged.

Insert @ in this column if the income/expenses is combined with income/expenses on assets or liabilities hedged.

Insert ^ in this column if the derivative has unpaid financing premiums.

Column 19 - Unrealized Valuation Increase/(Decrease)

For purposes of this schedule, increases should be reported when the connect results in an increase to the asset or a decrease to the liability. A decrease should be reported when the change results in a decrease to the asset or an increase to the liability.

Column 20 - Total Foreign Exchange Change in Book/Adjusted Ca. ving Var e

This is a positive or negative amount that is defined as "c po, ron of the total change in Book/Adjusted Carrying Value for the year that is attributable to for ign exchange differences for a particular derivative.

The amounts reported in this column should be invided as net unrealized foreign exchange capital gain/(loss) in the Capital and Surplus Action of

Column 21 - Current Year's (Amortization) Acception

For purposes of this schede, **positiv amounts** should be reported when the change results in an increase to the asset or a decrease to the liability. A **negative amount** should be reported when the change results in a decrease to the asset or an increase to the liability.

Column 22 - Gain (Loss) on Termina. n - Recognized

This repredicts gain (los) on termination that is not deferred or used to adjust basis of hedged items.

This equals con. deration received less book/adjusted carrying value at termination.

Column 23 - Adjustment to the Carrying Value of Hedged Item

This represents the gain (loss) on termination that was used to adjust the basis of a hedged item in the current year.

 poludes the book/adjusted carrying value of premiums that were allocated to the purchase cost on exercise of an option.

Column 24 - Gain (Loss) on Termination - Deferred

This represents the gain (loss) on termination that was deferred over year-end.

This equals consideration received less book/adjusted carrying value at termination.

Column 25 - Hedge Effectiveness at Inception and at Termination

For hedge transactions show as a percentage expressed as (XX / YY), where "XX" shows the hedge effectiveness percentage at inception and "YY" shows the hedge effectiveness percentage at termination.

For example, 100.45% hedge effectiveness at inception and 94.90% hedge effectiveness on December 31 of the current year is reported as "100 / 95."

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, enter a reference code not ber in his column (e.g., 0001, 0002, etc.) then disclose the financial or economic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each reference code number (sed in the schedule.)

A reference code number may be used multiple times in this column to notice and explanation.

For example: 0001 Reduces bond portfolio duration by .2 mars.

a) Fair Value Hedges:

How much of the change in value of the hedge. \(\text{em(s)} \) was hedged by the change in value of the derivative, both:

- At the inception of the derivative transaction; as a
- At termination.

b) Cash Flow Hedges:

How much of the change in each tows or present value of each flows of the hedged item(s) was hedged by the change in each tows or present value of each flows of the derivative, both:

- At the inception of a derivative transaction; and
- At termination

** Column 26 through 30 will be electronic o. ly. **

Column 26 - Legal Entity (2011). (LEI)

Prov. 6 the 20-character Legal Entity Identifier (LEI) for any counterparty as assigned by a designated Local of grating Unit. If no LEI number has been assigned, leave blank.

Columns 37 to sugt. 30 ar for derivatives with financing premiums

Column 27 Undiscounted Premium Cost

Report the total, undiscounted (contractual) cost to acquire/enter into the derivative.

Column 28 - Unpaid Undiscounted Premium Cost

Report the undiscounted (contractual) cost to acquire/enter into the derivative unpaid by the reporting entity.

Column 29 - Fair Value of Derivative, Excluding Impact of Financing Premiums

Reflect the fair value of the derivative adjusted to exclude the impact of discounted future settled premiums. For example, if the fair value of the derivative reported in column 16 has been reduced due to expected cash outflows representing the reporting entity's future payment of financing premiums, the consideration of those future premium cash outflows shall be removed from the reported fair value of the derivative captured in this column.

(At acquisition, a derivative may be reported with a net zero fair value in column 16 as the value of the derivative and the net present value of future financing premiums owed from the acquisition of the derivative may offset. The fair value reported in column 30 shall reflect the fair value. The derivative without an offset for the future financing premiums.)

Column 30 — Unrealized Valuation Increase/Decrease, Excluding Impact of Financing Promium.

Reflect the unrealized gain or unrealized loss reported for the derivative. You exclude the impact from discounted future settled premiums. For example, if the valution a rease/valuation decrease reported in column 17 includes "losses" to recognize the net premium value of the financing cost owed by the reporting entity, those "losses" shall be removed from the unrealized valuation increase/decrease reflected in this column.

Definitions:

Hedging Effective:

A derivative transaction that is used in hedging transactions that meet the criteria of a highly effective hedge as described in SSAI No. 86—Derivatives, which are valued and reported in a manner that is consistent with the hedged asset or liability. These transactions have been voluntarily designated and are effective as of the reporting date.

Hedging Other:

A der vative ransaction that is used in a hedging transaction where the intent is for an economic reduction f or or n re risk factors. This transaction is not part of an effectively designated relationship as described under SSAP No. 86—Derivatives.

Replication:

A derivative transaction entered into in conjunction with other investments in order to reproduce the investment characteristics of otherwise permissible investments described under SSAP No. 86—Derivatives. A derivative transaction entered into by a reporting entity as a hedging or income generation transaction shall not be considered a replication (synthetic asset) transaction. These transactions are considered to be replications as of the reporting date.

Income Generation:

A derivative transaction written or sold to generate additional income or return to the reporting entity as described under SSAP No. 86—Derivatives.

Other:

A derivative transaction written or sold by the reporting entity used for me as other than (1) Hedging Effective, (2) Hedging Other, (3) Replication, or (4) Income Generation of finition listed above or referenced in SSAP No. 86—Derivatives. When this subcategory is utilities it, a recription of the use should be included in the footnotes to the financial statements

SCHEDULE DB - PART B - SECTION 1

FUTURES CONTRACTS OPEN DECEMBER 31 OF CURRENT YEAR

Include all futures contracts positions open December 31 of current year, including those which were open on December 31 of previous year, and those acquired during current year.

In the Broker Name/Net Cash Deposits footnote, list, in alphabetical sequence, brokers with whom cash deposits have been made, cumulative changes made to the deposits and the beginning and ending cash balances.

Column 1 — Ticker Symbol

If traded on an exchange, disclose the ticker symbol.

Column 2 — Number of Contracts

Show the total number of contracts open on Dec. 31 of the reporting year as absolute (non-negative) value.

Column 3 - Notional Amount

Show the total notional amount of the futures position and 31 of the reporting year as absolute (non-negative) value. Guidance for determining tot half included in the Schedule DB General Instructions and SSAP No. 86—Derivatives.

Column 4 - Description

Give a complete and accurate description and derivative instrument, including a description of the underlying securities, currencies, rate, indices commodities, derivative instruments or other financial market instruments.

For derivatives with financial premiums, include information on the terms of the financing premium, including whether it is due periodically or at maturity, and the next payment date.

Do not use internal descriptions or identifiers unless provided as supplemental information.

Column 5 — Description of Items 1 'edg. d, Used for Income Generation, or Replicated

Describe the "sea, or "abilities hedged, including CUSIP(s) when appropriate. For example, "Bond Portfolio Hedge," "VAGLB Hedge," "Fixed Annuity Hedge," "Investment in Foreign Operations," etc.

If here og a specific bond, report the CUSIP and a complete and accurate description of the bond; if multiple CUSIPs, note that there are multiple CUSIPs and report the equity ticker or name of the trimate parent, as applicable.

If no ging a guaranteed investment contract or funding agreement, report as "GIC Hedge" or "FA

For a foreign operations hedge, report as "Net Investment in Foreign Operations." For annuity hedging, describe whether hedging fixed or variable annuities.

If hedging a specific mortgage loan asset, report as "Mortgage Loan" and provide the corresponding loan number reported on Schedule B, Part 1, Column 1.

Describe the assets against which derivatives are written in income generation transactions.

If a replication, report the RSAT Number and Description of the RSAT (Columns 1 and 2 from Schedule DB, Part C, Section 1).

Column 6 - Schedule/Exhibit Identifier

Identify the Schedule or Exhibit of the hedged item(s), such as Schedule A; B; BA; D Part 1; D, Part 2 Section 1; or D, Part 2, Section 2, if appropriate. Otherwise "N/A."

Use clear abbreviations for schedules, such as D 1 (Schedule D, Part 1) D 2-1 (Schedule D, Part 2, Section 1), D 2-2 (Schedule D, Part 2, Section 2), etc.

Column 7 - Type(s) of Risk(s)

Identify the type(s) of risk(s) being hedged: "Interest Rate," "Credit," "Durane," "Currency," "Equity/Index," "Commodity" or, if reporting other risks, provide a description of the rolls within the field or in a footnote listed in this Schedule.

If footnoted, please enter a reference code in this column (e.g., a, b, c, etc.) then disclose the description of the risk in Schedule DB footnotes for each reference code year. The schedule.

In the event there is more than one type of risk, use the most relevant risk

Column 8 - Date of Maturity or Expiration

Show the date of maturity or expiration of the derivate as appropriate.

Column 9 - Exchange

Show the name and the Commodity Futures 'ading Commission's Legal Entity Identifier (LEI), if an LEI number has been assigned, for the exchange in which the contract was transacted.

Column 10 - Trade Date

Show the trade date of the originar near ion.

The reporting entity may so unarize in one line all identical derivative instruments with the same exchange or counterparty shows a to last trade date, but only if the instruments are identical in their terms (e.g., type, maturity, expiration or settlement, and strike price, rate or index).

Column 11 - Transaction Price

Show the rice a which he futures contract was originally purchased or sold.

If several positions of the same futures contract are summarized, show the weighted average price.

Column 12 - Report of Date Price

low to reporting date closing price. Report price as published by the exchange.

468

Column 13 - Fan aue

Report the net unsettled futures position from the time lag (typically one day with U.S. futures brokers) between the change in the cumulative variation margin (Columns 15 and 18) and the actual settlement with the futures brokers.

This represents the pending cash settlement of the futures position.

Column 14 - Book/Adjusted Carrying Value

Represents the statement value of the futures position, with any nonadmitted assets added back, and is determined based on how the futures contract is being used, in accordance with SSAP No. 86—Derivatives.

Note that any cash deposits placed with the broker are included in the Broker Name/Net Cash Deposits footnote only and not in the Book/Adjusted Carrying Value.

Column 15 - Highly Effective Hedges - Cumulative Variation Margin

On long contracts, show the number of contracts (Column 2) times the difference between the reporting date price (Column 12) and transaction price (Column 11) times the future value of one (1) point (Column 22).

On short contracts, show the number of contracts (Column 2) time the litterence between the transaction price (Column 11) and the reporting date price (Column 12) times the futures value of one (1) point (Column 22).

An exception is that this column would not be populated to highly effective futures of forecasted transaction or firm commitments.

Column 16 - Highly Effective Hedges - Deferred Variation Margin

This represents the variation margin that has been de red and therefore not recognized as an unrealized or realized gain (loss) or as investo, and income.

Note: If the entire amount of the variation margin was deferred, the amount reported will be the same as is reported in Column 15.

Column 17 - Highly Effective Hedges - Clange v Va istion Margin Gain (Loss) Used to Adjust Basis of Hedged Item

This represents the variation make in yeed in the current year to adjust the basis of a hedged item.

Column 18 - Cumulative Variation argin for All Other Hedges

On long contracts, so we are number of contracts (Column 2) times the difference between the reporting of the project (Column 12) and transaction price (Column 11) times the futures value of one (1) point (Column 22).

On bort contracts, show the number of contracts (Column 2) times the difference between the true action price (Column 11) and the reporting date price (Column 12) times the futures value of one (1) point (Column 22).

Column 19 — A Guange Variation Margin Gain (Loss) Recognized in Current Year

investment income for the year.

This column will be populated for highly effective futures hedging at fair value and All Other futures.

This column will not be populated for highly effective futures hedging at amortized cost.

Column 20 - Potential Exposure

Potential Exposure is a statistically derived measure of the potential increase in derivative instrument risk exposure, for derivative instruments that generally do not have an initial cost paid or consideration received, resulting from future fluctuations in the underlying interests upon which derivative instruments are based.

For futures, the Potential Exposure = (Initial Margin per contract on the valuation date, set by the exchange on which contract trades) x (the number of contracts open on the valuation date).

Column 21 - Hedge Effectiveness at Inception and at Year-end

For hedge transactions show, as a percentage expressed as (XX / YY), where "Xx shows the hedge effectiveness percentage at inception and "YY" shows the hedge effectiveness percentage at reporting date.

For example, 100.45% hedge effectiveness at inception and 1.90% hedge effectiveness on December 31 of the current year is reported as "100 / 95."

Round to the nearest whole percentage. Do not use decimals.

When hedge effectiveness cannot be calculated, e. a re-rence code number in this column (e.g., 0001, 0002, etc.) then disclose the financial or eco-omic impact of the hedge at the end of the reporting period in Schedule DB footnotes for each tell ence tode number used in the schedule.

A reference code number may be used multiputime in this column to indicate the same explanation.

For example: 0001 Reduces bond ortfolio caration by .2 years.

a) Fair Value Hedges:

How much of the elvinge in value of the hedged item(s) was hedged by the change in value of the derivative, both:

- At the inception of the derivative transaction; and
- At reporting fate.

b) Cash Flov Hedge

How in whor are change in cash flows or present value of cash flows of the hedged item(s) was hedged by the change in cash flows or present value of cash flows of the derivative, both:

- At the inception of the derivative transaction; and
 - At reporting date.

Column 22 - Var. 1 One (1) Point

This represents the monetary value of a one (1) point move in a futures position published by the exchange. This monetary value of one (1) point is utilized in the calculation of the futures' variation margin.

Column 23 - Fair Value Hierarchy Level and Method Used to Obtain Fair Value Code

Whenever possible, fair value should represent the price at which the security could be sold, based on market information. Fair value should only be determined analytically when the market-based value cannot be obtained.

The following is a listing of valid fair value level indicators to show the fair value higrarchy level.

"1" for Level 1

"2" for Level 2

"3" for Level 3

The following is a listing of the valid method indicators for derivatives a show the method used by the reporting entity to determine the Rate Used to Obtain Fair Value.

"a" for securities where the rate is determined by a prime ser

"b" for securities where the rate is determined by a Stock explange.

"c" for securities where the rate is determed by a broker or custodian. The reporting entity should obtain and maintain the price of policy for any broker or custodian used as a pricing source. In addition, the broker must either be approved by the reporting entity as a counterparty for buying and so mig securices or be an underwriter of the security being valued.

"d" for securities where means is etermined by the reporting entity. The reporting entity is required to maintain a record of the pricing methodology used.

Enter a combination of hierarch, and method indicator. The fair value hierarchy level indicator would be listed first and the method used to determine fair value indicator would be listed next. For example, use "lb" to report Leve 1 for the fair value hierarchy level and stock exchange for the method used to determine fair value.

Column 24 - Source Used to Obtain Fair Value

For Method Code "a," identify the specific pricing service used.

For Method Code "b," identify the specific stock exchange used.

The listing of most stock exchange codes can be found in the Investment Schedules General Instructions or the following Web address:

www.fixprotocol.org/specifications/exchanges.shtml

For Method Code "c," identify the specific broker or custodian used.

For Method Code "d," leave blank.

Column 25 - Legal Entity Identifier (LEI)

Provide the 20-character Legal Entity Identifier (LEI) for any contemparation assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave black

**Columns 26 through 29 are for derivatives with financing premiums

Column 26 - Total Undiscounted Premium Cost

Report the total, undiscounted (contractual) contractual) contractual) contractual contrac

Column 27 - Unpaid Undiscounted Premium Cost

Report the undiscounted (contractual) sist to equire/enter into the derivative unpaid by the reporting entity.

Column 28 - Fair Value of Derivative, Exc. ding Impact of Financing Premiums

Reflect the fair value of the derivative adjusted to exclude the impact of discounted future settled premiums. For example, if the fair value of the derivative reported in column 16 has been reduced due to expected eash outflow representing the reporting entity's future payment of financing premiums, the consideration of the pattern training premium cash outflows shall be removed from the reported fair value of the derivitive apture in this column.

(At acquisition, derivative may be reported with a net zero fair value in column 16 as the value of the derivative and the net present value of future financing premiums owed from the acquisition of the derivative may offset. The fair value reported in column 30 shall reflect the fair value of the derivative with the acquisition of the derivative with the fair value of the future financing premiums.)

Column 29 - U realiz d Valuation Increase/Decrease, Excluding Impact of Financing Premiums

For example, if the valuation increase/valuation decrease reported in column 17 includes "losses" to recognize the net present value of the financing cost owed by the reporting entity, those "losses" shall be removed from the unrealized valuation increase/decrease reflected in this column.

SCHEDULE DB - PART B - SECTION 2

FUTURES CONTRACTS TERMINATED DURING CURRENT YEAR

Include all futures contracts which were terminated during current reporting year, both those that were open on December 31 of previous reporting year, and those acquired and terminated during current year.

Column 1 - Ticker Symbol

If traded on an exchange, disclose the ticker symbol.

Column 2 - Number of Contracts

The number of futures contracts terminated during the current year as absolute (no, negative) value.

Column 3 - Notional Amount

Show the total notional amount of the futures position terminated during the current year as absolute (non-negative) value. Guidance for determining notional is included in the Schedule DB General Instructions and SSAP No. 86—Derivatives.

Column 4 — Description

Give a complete and accurate description of the dark tive strument, including a description of the underlying securities, currencies, rates, indices, a model is, derivative instruments or other financial market instruments.

For derivatives with financing premiums include a formation on the terms of the financing premium, including whether it is due periodically described in the next payment date.

Do not use internal description tents, are unless provided as supplemental information.

Column 5 — Description of Item(s) Hed, d, Used fo Income Generation, or Replicated

Describe the assets or liabilities ged, including CUSIP(s) when appropriate. For example, "Bond Portfolio Hedge," "VA" LB Hedge, "Fixed Annuity Hedge," "Investment in Foreign Operations," etc.

If hedging a specific from report the CUSIP and a complete and accurate description of the bond; if multiple CUSIP note hat there are multiple CUSIPs and report the equity ticker or name of the ultimate page at a applicable.

If hedging a gua enteed investment contract or funding agreement, report as "GIC Hedge" or "FA Hedg."

If '___ing__pecific mortgage loan asset, report as "Mortgage Loan" and provide the corresponding I an number reported on Schedule B, Part I, Column I.

Deserme the assets against which derivatives are written in income generation transactions.

If a replication, report the RSAT Number and Description of the RSAT (Columns 1 and 2 from Schedule DB, Part C, Section 1).

Column 6 - Schedule/Exhibit Identifier

Identify the Schedule or Exhibit of the hedged item(s), such as Schedule A; B; BA; D, Part 1; D, Part 2, Section 1; or D, Part 2, Section 2, if appropriate. Otherwise "N/A."

Use clear abbreviations for schedules, such as D 1 (Schedule D, Part 1) D 2-1 (Schedule D, Part 2, Section 1), D 2-2 (Schedule D, Part 2, Section 2), etc.

Column 7 - Type(s) of Risk(s)

Identify the type(s) of risk(s) being hedged: "Interest Rate," "Credit," "Duration," "Currency," "Equity/Index," "Commodity" or, if reporting other risks, provide a description of the risk within the field or in a footnote listed in this Schedule.

If footnoted, please enter a reference code in this column (e.g., a, b, c, etc.) then disclose the description of the risk in Schedule DB footnotes for each reference code used in the schedule.

In the event there is more than one type of risk, use the most relevant risk.

Column 8 - Date of Maturity or Expiration

Show the date of maturity or expiration of the derivative, as appropriate.

Column 9 - Exchange

Show the name and the Commodity Futures Trading Commission's Leg. 1 Entity Identifier (LEI), if an LEI number has been assigned, for the exchange on which the contract was transacted.

Column 10 — Trade Date

Show the trade date of the original transaction.

The reporting entity may summarize on one list all identical derivative instruments with the same exchange or counterparty showing the last to be dan but only if the instruments are identical in their terms (e.g., type, maturity, expiration or settlement and strike price, rate or index).

Column 11 - Transaction Price

Show the original transaction arecase post at which the futures were purchased or sold).

If several positions of the same futures, ontract are summarized, show the weighted average price.

Column 12 - Termination Date

Show the date when the rivative position was terminated.

The report of en ity maj summarize on one line all identical instruments with the same exchange or counterpart, using the latest termination date.

Column 13 - Terr instion Price

The position was closed.

icate the cause of termination.

Column 15 — Cumulative Variation Margin at Termination

On long contracts, show the number of contracts (Column 2) times the difference between the termination price (Column 13) and transaction price (Column 11) times the futures value of one (1) point (Column 20).

On short contracts, show the number of contracts (Column 2) times the difference between the transaction price (Column 11) and the termination price (Column 13) times the futures value of one (1) point (Column 20).

Column 16 - Change in Variation Margin Gain (Loss) Recognized in Current Year

This represents the variation margin recognized as realized gains (losses), or as investment income in the current year.

Column 17 - Change in Variation Margin Gain (Loss) Used to Adjust Basis of Hedged Item in Current Year

This represents the amount of gains (losses) used to adjust the basis of a hedged item in the current year.

Column 18 - Change in Variation Margin Deferred

This represents the variation margin that has been deferred and, therefore not recognized as an unrealized or realized gain (loss) or as investment income.

Column 19 - Hedge Effectiveness at Inception and at Termination

For hedge transactions, show as a percentage expressed as (XX (YY)), where "XX" shows the hedge effectiveness percentage at inception and "YY" shows the heave effectiveness percentage at termination.

For example, 100.45% hedge effectiveness at in a tion and 94.90% hedge effectiveness on December 31 of the current year is reported as "100 / 95.

Round to the nearest whole percentage. Do not us decima

When hedge effectiveness cannot be calcula 1, error a reference code number in this column (e.g., 0001, 0002, etc.) then disclose the mancial or economic impact of the hedge at the end of the reporting period in Schedule DB for those 15 can be reference code number used in the schedule.

A reference code number may be and makiple times in this column to indicate the same explanation.

For example: 0001 Reduces book portfolio duration by .2 years.

a) Fair Value Hedges;

How much of the bange in value of the hedged item(s) was hedged by the change in value of the derivative, but:

- be a much of the derivative transaction; and
- At tern nation.

b) __Ca h Flow Hedges:

If w much of the change in cash flows or present value of cash flows of the hedged item(s) was dged by the change in cash flows or present value of cash flows of the derivative, both:

- At the inception of the derivative transaction; and
- At termination.

Column 20 - Value of One (1) Point

This represents the monetary value of a one (1) point move in a futures position published by the exchange.

SUPPLEMENTAL INVESTMENT RISKS INTERROGATORIES

This set of Supplemental Interrogatories is to assist regulators in identifying and analyzing the risks inherent in the entity's investment portfolio. The Supplemental Investment Risks Interrogatories apply only to general account assets. These lines were determined based upon the investment categories contained in the NAIC Statutory Statement and considered as invested assets. The reported amounts are to be consistent with net admitted amounts reported by the entity in the statement and supporting schedules, not on a consolidated basis. Compute the percentage calculations by dividing the reported amount by the total admitted assets reported in Line 1 of the Interrogatories unless otherwise indicated. It is recommended that the first step in responding to this set of Interrogatories is for the person preparing this document to read through the Interrogatories to gain an understanding of the reporting requirements.

All reporting entities must answer Interrogatories 1 through 4, 11 through 16, 18, 19 and, if applicable 1 through 23. Answer each Interrogatory 5 through 10 only if the reporting entity's aggregate holdings in foreign investments as addressed in Interrogatory 4 equals or exceeds 2.5% of the reporting entity's total admitted assets. Answer Interrogatory 17 only if the reporting entity's aggregate holdings in mortgage loans as addressed in Interrogatory 10 equals or exceeds 2.5% of the reporting entity's total admitted assets. For Life and Fraternal blanks, responses are to excluse Sequence Accounts. For the Property/Casualty blank, responses are to exclude Protected Cell Accounts.

INSTRUCTIONS FOR USE OF BARCODES

It is the responsibility of the company to prepare and utilize barcodes correctly.

The upper right-hand corner of the jurat page, and other pages and forms as identified on the Document Identifier Codes listing, will be the location of a 17-digit barcode symbol. The barcode standard to be utilized is the 3 of 9 (or 39) methodology. The barcode should be printed using at least a 24-point font. In addition to the barcode symbols, the name of the reporting entity, the year, and the document code should be printed on the barcode label. When the barcode is printed as part of the page rather than an affixed label, the reporting entity's name need not be printed above the bar or

The barcode consists of the entity identifier (5 digits), the year (YYYY-4 digits), the document identifier 3 digits), the state code (2 digits), if state specific page, the data indicator (1 digit) and a filing type identifier (1 digit).

This 17th digit should utilize the following codes:

- 0 to represent the annual filings
- 1 to represent the March quarterly filing
- 2 to represent the June quarterly filing
- 3 to represent the September quarterly filing
- 4 to represent the Health Maintenance Organization's form quarter filing
- 5 to represent amended annual filings
- 6 to represent amended March quarterly filing
- 7 to represent amended June quarterly filiam
- 8 to represent amended September quality filing

For filings of a reporting entity, the entity idealifier is the NAIC company code number.

The year is represented as the last four nights of the filing year. For the 2018 annual statement due March 1, 2019, the year would be 2018.

The document identifier represents west page, schedule, exhibit, etc., is being filed. The respective identifiers for those documents requiring a bare do are included on the document identifier listing.

The state code represents the beautifier can be filed for each individual state (e.g., the state business pages). The two-digit code would be the same as used on Schedule T. If it is not a state-specific form, the state code is 00. The state code Other is 58, and to coo for G and Total is 59. If the reporting entity has nothing to report on any state-specific supplemental schedule or exhibit, the bareode included in the Supplemental Exhibits and Schedules Interrogatories should contain a state code of 59:

The data indicator represents if the document contains data. For filings containing data place a one (1) in this field. If the document is a NONE, place a zero (0) in this field.

The filing type identifier is used to indicate the filing of NAIC filing components or state mandated (state specific) filing requirements other than those required by the NAIC. For NAIC filing requirements, the type code is 0. For state filing requirements, the type code is 1.

If forms which are required to have a separate barcode as identified on the Document Identifier Codes listing are bound in the statement, these forms MUST have the barcode affixed to them. If a reporting entity submits with the March 1 filing a page requiring a barcode and that page has not been completed due to a later filing date, the barcode should not be affixed for the March filing. If the filing includes a page listing none schedules (and the state in which you are filing permits such a filing) and any of these schedules fall within that listing that requires a barcode, the barcode must be placed to the right of the name of the page, exhibit or schedule. On those forms which are completed on a by-state basis and are marked none because the company does not write that type of business or that particular state page is none, place the appropriate identifier with the data indicator of zero (0). State pages which have values reported must use the appropriate state barcode identifier from Schedule T. If any state requires the filing of a none "by-state basis" page, the name of the appropriate state must still be printed on the hard copy after "For the State of ______."

A listing of the Document Identifier Codes can be found at www.naic.org/cmte_e_app_blanks.htm.

The reporting entity is required to affix the appropriate barcode next to the respective Supplemental Incorrogatory using the document identifier code provided. Note that it is only Supplemental Interrogatories to which the apporting entity has responded "NO" that it does not have to file a particular exhibit or form, and for which the polytical get or form is marked none that the appropriate barcode be affixed. For supplements that are state specific, the polytic once a barcode should be affixed is when that type of business is not written at all in any state.
